Sustainability in Food and Agriculture

Contents

VOLUME 3, ISSUE 1, 2022		
No	Editorial	Pages
1	CHESTNUT PRODUCTION AND ITS PROSPECTS IN NEPAL	01-10
2	A STUDY ON EFFICACY OF DIFFERENT PESTICIDES AGAINST POTATO TUBER MOTH (PHTHORIMAEA OPERCULELLA) IN STORAGE SEED POTATO	11-14
3	PREPARATION AND QUALITY EVALUATION OF SUGAR AND HONEY BASED BEETROOT CANDIES	15-18
4	ABUNDANCE, DAMAGE SEVERITY OF MAJOR INSECT PESTS OF CHILLI AND THEIR SUSTAINABLE MANAGEMENT THROUGH IPM BASED MODULES	19-23
5	EFFECT OF MULCHING MATERIAL ON THE VEGETATIVE GROWTH AND YIELD OF OKRA (<i>Abelmoschus esculentus</i> L. var US 7109) IN BHARATPUR, CHITWAN	24-27
6	EFFECTS OF FOLIAR APPLICATION OF SALICYLIC ACID AND CALCIUM CHLORIDE ON YIELD, YEILD COMPONENTS AND SOME PHYSIOLOGICAL PARAMETERS IN COTTON	28-32
7	POTENTIAL USE OF ANIMAL MANURES IN MANAGING PHYTOPHTHORA WILT OF CHILLI CAUSED BY PHYTOPHTHORA CAPSICI	33-39
8	EVALUATION OF GERMINATION QUALITY OF WHEAT SEEDS DRIED IN FLUIDIZED BED DRYER	40-45
9	FOOD SUSTAINABILITY IN A POST COVID-19 ERA: THE NIGERIA PERSPECTIVE	46-51
10	DIFFERENT COMBINATIONS OF BIOCHAR AND UREA AS A NITROGEN SOURCE: EFFECT ON GROWTH, TUBER QUALITY, AND YIELD OF POTATO	52-57

Sustainability in Food and Agriculture

Editorial

Agriculture production systems are facing unprecedented challenges from an increasing demand for food for a growing population, high competition over dwindling natural resources, loss of biodiversity, emerging pests and diseases, compounded by the adverse effects of climate change. In the coming 35 years, agriculture will face an unprecedented confluence of pressures, including a 30 percent increase in the global population, intensifying competition for increasingly scarce land, water and energy resources, and the existential threat of climate change. To provide for a population projected to reach 9.3 billion in 2050 and support changing dietary patterns, estimates are that food production will need to increase from the current 8.4 billion tonnes to almost 13.5 billion tonnes a year. Achieving that level of production from an already seriously depleted natural resource base will be impossible without profound changes in our food and agriculture systems. We need to expand and accelerate the transition to sustainable food and agriculture which ensures world food security, provides economic and social opportunities, and protects the ecosystem services on which agriculture depends.

Scientific Board

Editorial Team

Editor in Chief

Dr Fridelina Sjahrir
Faculty of Engineering and Life Sciences
Bestari Jaya, Selangor Darul Ehsan, Malaysia

Managing Editor

Dr Nadirah Musa
School of Fisheries and Aquaculture Sciences
Universiti Malaysia Terengganu
Kuala Terengganu, Terengganu, Malaysia
