Sustainability in Food and Agriculture

Contents

VOLUME 4, ISSUE 1, 2023		
No	Editorial	Pages
1	YIELD EVALUATION OF DIFFERENT VARIETIES OF POTATO IN BAJHANG DISTRICT OF NEPAL	01-05
2	ADOPTION OF RIVERBED FARMING TECHNOLOGIES IN KAMALA RIVER BASIN, SIRAHA DISTRICT, NEPAL	06-10
3	EFFECT OF BULB SIZES AND VARIETIES ON GROWTH, YIELD AND QUALITY OF ONION SEEDS	11-19
4	THE FUTURE STATUS OF EGYPTIAN DATE PALM AFTER THE 2.5 MILLION PALM TREES-NATIONAL PROJECT	20-27
5	CORRELATION COEFFICIENT AND PATH ANALYSIS OF YIELD AND YIELD ATTRIBUTING CHARACTERS OF RICE (ORYZA SATIVA) GENOTYPES UNDER REPRODUCTIVE DROUGHT STRESS IN THE TERAJ REGION OF NEPAL	28-33
6	ASSESSMENT OF THE ADOPTION OF ORANGE FLESHED SWEET POTATO AMONG FARMERS IN OSUN STATE	34-38
7	DIFFERENT POST-HARVEST TREATMENTS ON PHYSICOCHEMICAL PROPERTIES AND SHELF LIFE OF TOMATO (SOLANUM LYCOPERSICUM CV. PUSA RUBY) FRUITS	39-42
8	EVALUATION OF WEED CONTROL PRACTICES ON YIELD RESPONSE OF MAIZE CULTIVARS IN THE RAINFOREST ZONE OF ANAMBRA STATE	43-45

Sustainability in Food and Agriculture

Editorial

Agriculture production systems are facing unprecedented challenges from an increasing demand for food for a growing population, high competition over dwindling natural resources, loss of biodiversity, emerging pests and diseases, compounded by the adverse effects of climate change. In the coming 35 years, agriculture will face an unprecedented confluence of pressures, including a 30 percent increase in the global population, intensifying competition for increasingly scarce land, water and energy resources, and the existential threat of climate change. To provide for a population projected to reach 9.3 billion in 2050 and support changing dietary patterns, estimates are that food production will need to increase from the current 8.4 billion tonnes to almost 13.5 billion tonnes a year. Achieving that level of production from an already seriously depleted natural resource base will be impossible without profound changes in our food and agriculture systems. We need to expand and accelerate the transition to sustainable food and agriculture which ensures world food security, provides economic and social opportunities, and protects the ecosystem services on which agriculture depends.
