## Contents

| VOLUME 4, ISSUE 2, 2023 |  |       |
|-------------------------|--|-------|
| No                      | Editorial  | Pages |
| 1                       | STUDIES OF MANGO SUDDEN DEATH DISEASE IN THE VICINITY OF TANDO JAM   | 46-48 |
| 2                       | BLAST DISEASE A MAJOR THREAT TO FOOD SECURITY: A REVIEW OF PATHOGEN AND STRATEGIES TO CONTROL                                    | 49-54 |
| 3                       | POST-HARVEST EVALUATION OF CUCUMBER, BRINJAL, AND TOMATO GENOTYPES IN THE HIGH HILL ENVIRONMENT OF LUMLE, NEPAL                  | 55-60 |
| 4                       | ASSESSMENT OF FACTORS AFFECTING POST-HARVEST LOSS OF POTATO AND MANAGEMENT IN GUMMER WOREDA                                      | 61-64 |
| 5                       | CONSTRUCTION AND BENEFIT ESTIMATION OF BLUEBERRY SIGHTSEEING ORCHARD   | 65-67 |
| 6                       | EFFECT OF UREA APPLICATION ON THE GROWTH AND YIELD OF CUCUMBER ( <i>Cucumis sativus</i> cv. Bhaktapur Local L.) AT BAGLUNG NEPAL | 68-71 |
| 7                       | ROLE OF KAOLIN ON FRUIT QUALITY MANAGEMENT   | 72-74 |

# Sustainability in Food and Agriculture (SFNA)

## Editorial

Agriculture production systems are facing unprecedented challenges from an increasing demand for food for a growing population, high competition over dwindling natural resources, loss of biodiversity, emerging pests and diseases, compounded by the adverse effects of climate change. In the coming 35 years, agriculture will face an unprecedented confluence of pressures, including a 30 percent increase in the global population, intensifying competition for increasingly scarce land, water and energy resources, and the existential threat of climate change. To provide for a population projected to reach 9.3 billion in 2050 and support changing dietary patterns, estimates are that food production will need to increase from the current 8.4 billion tonnes to almost 13.5 billion tonnes a year. Achieving that level of production from an already seriously depleted natural resource base will be impossible without profound changes in our food and agriculture systems. We need to expand and accelerate the transition to sustainable food and agriculture which ensures world food security, provides economic and social opportunities, and protects the ecosystem services on which agriculture depends.

## Scientific Board

### Editorial Team

#### Editor in Chief

Dr Fridelina Sjahrir  
Faculty of Engineering and Life Sciences  
Bestari Jaya, Selangor Darul Ehsan, Malaysia

#### Managing Editor

Dr Nadirah Musa  
School of Fisheries and Aquaculture Sciences  
Universiti Malaysia Terengganu  
Kuala Terengganu, Terengganu, Malaysia
